

## Field visits

Field visits are organized by the department of Community medicine for Phase I, II, III MBBS students to give field level exposure to the competencies covered in each phase. Students are taken to Rural and Urban Health Training centres, ICDS centres to learn the various elements of Primary health care. Arrangements are also made for the students to visit Water Treatment Plant, Water analysis lab and Food analysis lab. In hospital visits are also planned periodically to Effluent Treatment Plant, Biomedical Waste Management. Students are also taken to MTM clinic and exposed to the preventive aspects and screening strategies of NCDs and also the implementation of the MTM scheme at various levels of health care.
