

Foundation course for Phase I MBBS Students

As a part of Foundation course, Phase I MBBS Students were sensitized regarding the various aspects and domains in Community medicine and Public health. Field visits were organized and the students were taken to the Primary Health Centre and ICDS centre to show them the elements of primary health care. Students were also taken to the MTM clinic and the importance of screening for NCDs was explained. Sensitization regarding the Biomedical Waste Management was done. In addition to these, students were explained about various concepts like the Role of Community physician and the significance of making a Community Diagnosis.
